

Validation Certificate

The following QIAGEN products are validated for use in your forensic applications:

Investigator Quantiplex Kit (200), cat. no. 387016

Investigator Quantiplex HYres Kit (200), cat. no. 387116

Investigator Quantiplex Pro Kit (200), cat. no. 387216

Investigator Quantiplex Pro RGQ Kit (200), cat. no. 387316

Our developmental validation study was based on the recommendations of:

The European Network of Forensic Science Institute (ENFSI) (2010)

The Revised Validation Guidelines of the Scientific Working Group on DNA Analysis Methods (SWGDM) (2012)

Quality Assurance Standards for Forensic DNA Testing Laboratories (2011)

The results of this study show that the kit is recommended for forensic casework, paternity testing, and other human identity testing applications.
