

Consider bringing efficiency to your crime lab

Challenge the limits of STR kits

Top 5 reasons why every lab needs a secondary STR kit

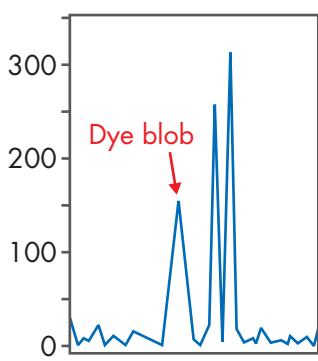

1

Marker crossover or allelic overlap

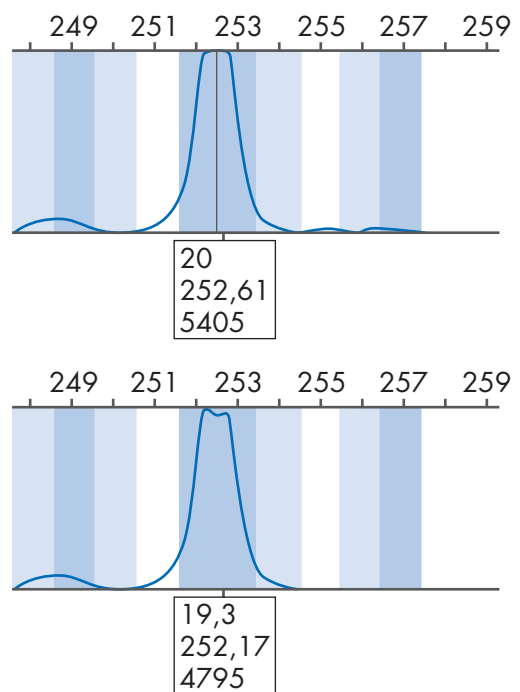

2

Dye blobs

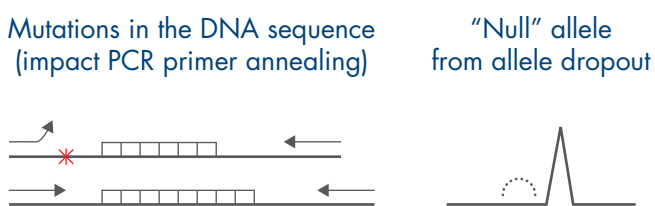

3

Marker migration

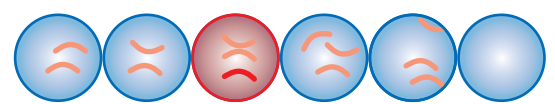

4

Null allele – primer binding site mutation

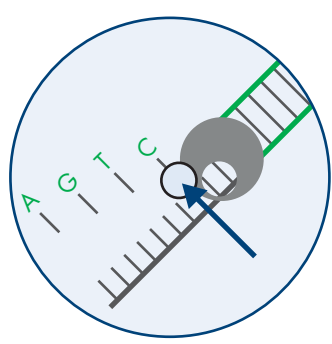

5

Rare alleles

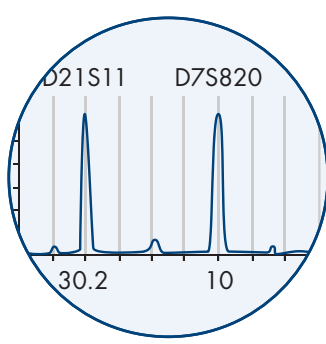

Recommended solution and benefits

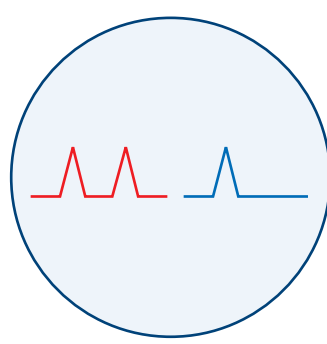

Bring **Investigator 24plex GO! Kit** as a backup and resolve issues during rework

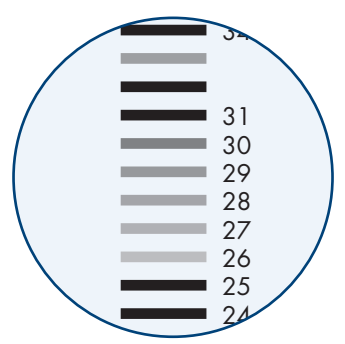

Different primer sets to other kits

Different location of markers

Little/no allelic overlap

Large number of alleles in allelic ladder

Validation assistance from our **HID specialists**

Improved efficiency

Confident workflow decisions
