Important Note

HiSpeed® Plasmid Midi Kit, 12643

Dear QIAGEN kit user,

Due to a different supplier, the HiSpeed Plasmid Midi Kit, 12643 can contain QIAprecipitators with either light blue or yellow colors.

Rest assured, there is no change in quality and performance, as these have been tested intensively. All other components remain unchanged, and the kits will continue to provide the same high yields of concentrated DNA.

If you have any queries or concerns, please call toll-free [00800-22-44-6000](tel:00800-22-44-6000), or find regional phone numbers at: www.qiagen.com/contact

Best regards,

QIAGEN
