## Important Note

Dear customer,

We are very pleased to inform you that you can now purchase QIAprep® Spin Columns (100) (cat. no. 27115) separately. This means that you can utilize leftover buffers from the QIAprep Spin Miniprep Kit (cat. nos. 27104 and 27106) and still enjoy the same high-quality results.

Please note that QIAprep Spin Columns are suitable for use only with buffers provided with the QIAprep Spin Miniprep Kit. QIAprep Spin Columns can only be used with the *Quick-Start Protocol: QIAprep Spin Miniprep Kit* and with protocols included in the *QIAprep Miniprep Handbook*, which can be found on [www.qiagen.com/handbooks](http://www.qiagen.com/handbooks).

If you have any questions, please call one of the QIAGEN Technical Service Departments or distributors (see back cover of handbooks or visit [www.qiagen.com](http://www.qiagen.com)).

Best regards,

QIAGEN

Trademarks: QIAGEN®, QIAprep® (QIAGEN Group).
